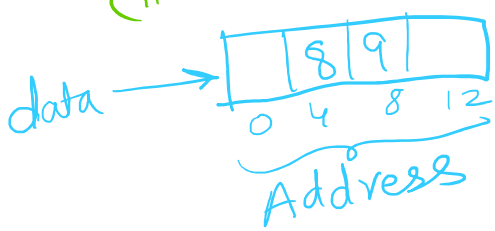
# What Is RAM ?

14 July 2024 07:45

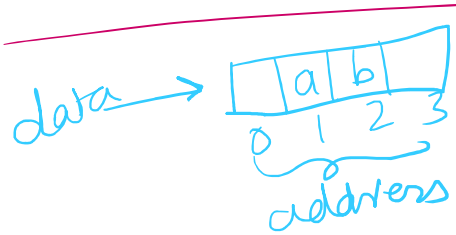
RAM = Random Access Memory

(Random allocation of data in RAM)



0, 4, 8, 12 } address of int, float, double,

×4



0, 1, 2, 3 } address of Char → ASCII

+1

1 bit → 0 | 1

1 byte → 8 bits

1024 bytes → 1 Kilo Byte

1024 KiloByte → 1 MegaByte

⋮

×64 → 64 bit computers

×32 → 32 bit computers

} memory allocation

1 in 32 bit Computer

0000 ..... 01

31 0's

that's how it works!!!
